Article : **PALMA 45 mm - Honeycomb Fabrics**
Version : 2019-02

The insulating honeycomb structure combined with a reflecting white backside makes Palma an essential article for every functional collection. Next to the 20 and 25mm varieties is this non-woven Honeycell fabric also available in a unique 45 mm single-cell variety, which is offered in a width of no less than 400 cm. It makes Palma ideal for larger windows; even with larger dimensions the fabric folds into a thin stack. The 45 mm variety is available in twelve colours.
