

ARTICLE DATA SHEET

Article : **EDMONTON 25 mm - Honeycomb Fabrics**
Version : 2019-02

The frontside and backside of this so-called full-tone crêpe have identical colours. This non-transparent material is available in no less than 18 contemporary colours. The slight crinkles in the fabric create a striking effect in front of a window. Because of the 25 mm honeycomb structure, Edmonton has an insulating effect that contributes to energy savings throughout the year.
