

ARTICLE DATA SHEET

Article : **Westmount FR BO 20mm - Honeycomb Fabrics**
Version : **2024-01**

Honeycell fabric Westmount FR BO is not only flame retardant, it is also black-out. This refined non-woven quality has a 20 mm honeycomb structure. The cells have a silver coating on the inside that not only blocks out the light but also provides insulation. It allows the fabric to optimally contribute to a comfortable indoor climate and energy savings during both winter and summer. Westmount FR BO is available in six natural tones and bright colours that match any interior.
